# ABOUT US

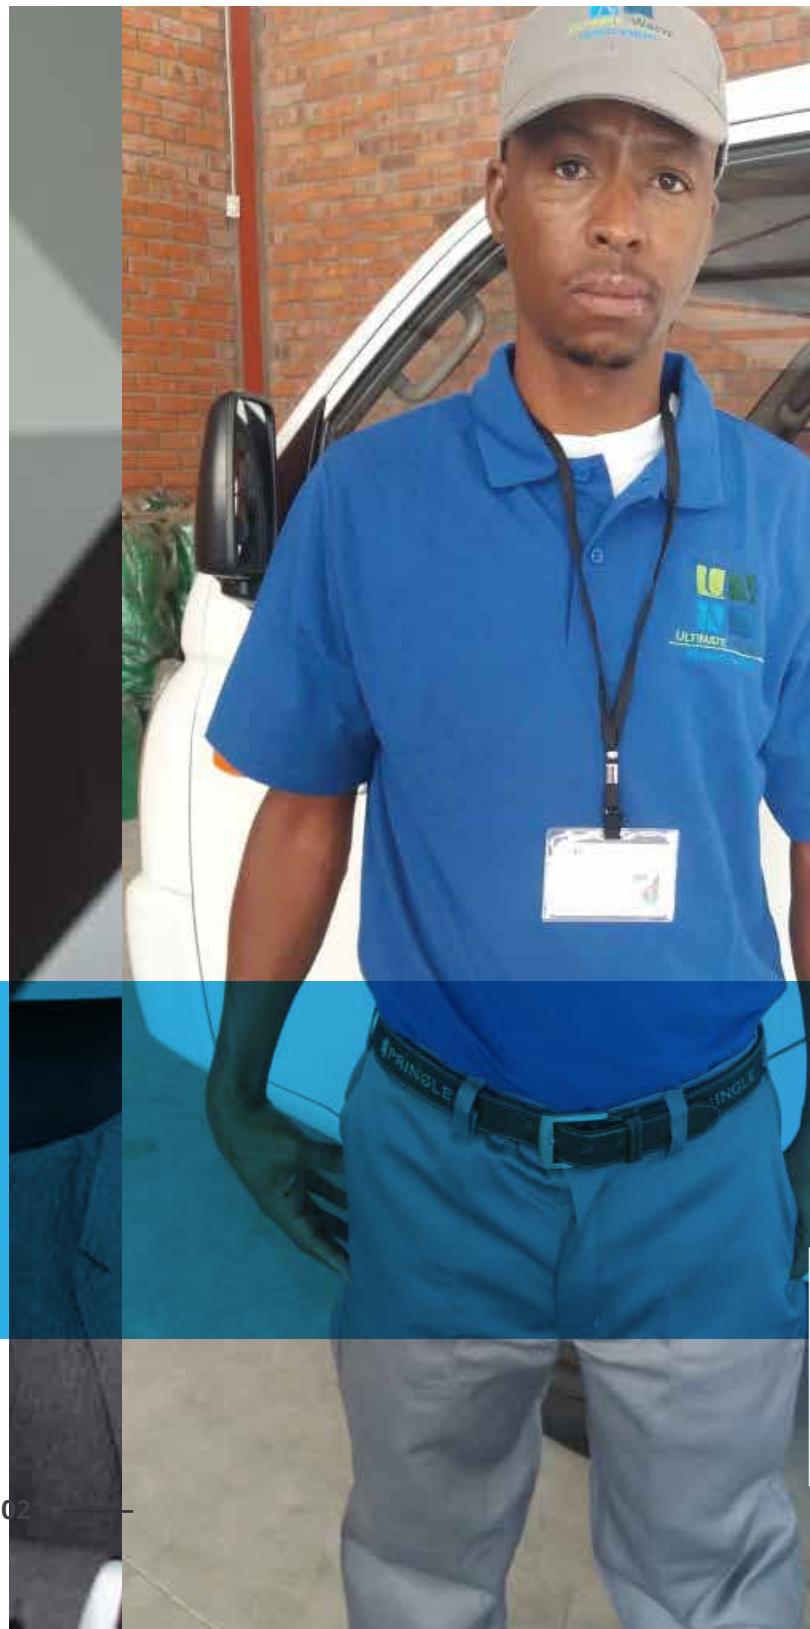

Ultimate Waste Management (PTY) LTD is a Level 1 BBBEE owned Medical Waste Management company with a national footprint across South Africa. Through our comprehensive market research, we have identified a critical need for efficient and cost-effective healthcare care risk waste management solutions, positioning us as leaders in the industry.

Contributing to a cleaner environmental landscape and striving for excellence in the industry.

*Our business is built on and guided by these core values:*

## VALUES

- TEAMWORK
- COMPLIANCE
- INTEGRITY
- ACCOUNTABILITY
- SUSTAINABILITY
- ENVIRONMENTAL RESPONSIBILITY
- EDUCATION AND AWARENESS SERVICE
- EXCELLENCE

## Company Vision

To become the leading innovator in the Medical Waste Management Industry, enhancing both the South African Health and Non-Health sectors. Our goal is to minimize environmental waste by advocating for responsible medical waste segregation and treatment at both individual and institutional levels.

## Company Mission

To deliver safe, sustainable, and cutting-edge solutions for managing various types of medical waste, thereby mitigating the environmental impact associated with improper medical waste management. We are dedicated to advancing equitable, eco-friendly, and cost-effective practices through a comprehensive system of medical waste reduction, reuse, recycling, exceptional customer service, and educational initiatives.

## COMPANY GOALS

- > Ongoing Industry Research
- > Accessible Training Programs
- > Development of Innovative Programs
- > Sustainable Practices in Recycling and Technology
- > Commitment to Zero Landfill Initiatives
- > Comprehensive Medical Waste Management Solutions

# COMPANY SERVICES

## Medical Waste Collection and Disposal

Secure and compliant removal of hazardous and non-hazardous medical waste.

## Compliance and Regulatory Consulting

Guidance on meeting healthcare waste management regulations and industry standards.

## On-site Waste Management Training

Comprehensive training programs for healthcare staff on safe waste handling practices.

## Waste Minimization and Recycling Programs

Strategies to reduce waste generation and promote sustainable recycling practices.

## Emergency Response and Spill Management

Rapid response services for healthcare waste spills and contamination incidents.

## SIX STAGES OF THE MEDICAL WASTE MANAGEMENT PROCESS

- > GENERATION
- > COLLECTION
- > TRANSPORTATION
- > STORAGE
- > TREATMENT
- > DISPOSAL

## THE CRADLE TO GRAVE PROCESS:

- > *The primary basis for the 'cradle to grave' principle in medical waste management is that the party/entity that generates waste is responsible for it. They are responsible for every stage of handling the waste until it has been safely disposed of.*
- > *Our primary objective is to work with our clients to ensure the efficient execution of a thorough medical waste management process, ensuring adherence to the possible highest compliance standards.*
- > *We ensure that every step of this process is properly captured and documented for compliance and audit purposes.*

## Collection

Medical waste containers are being scanned, weighed, and collected by a Healthcare Risk Waste Worker

## Central Storage

All the collected medical waste is kept in a safe storage that is monitored 24 hours. All HCRW is properly stored in compliance with SANS 10248-1:2008 (STORAGE OF WASTE)

## Transport

After weighing and classification, the waste is now ready to be transported to our treatment plant. Hazchem-fitted compliant and roadworthy vehicles are used for transporting HCRW in compliance with the Environmental and Traffic Acts to prevent any spillages and or road incidents from occurring.

## TREATMENT AND DISPOSAL:

Ultimate Waste Management Pty Ltd uses the safest treatment and disposal methods which includes Autoclaves, incinerators and responsible landfill sites

### OTHER SERVICE OFFERINGS
